Drive-On Benches

CRS6000T-DO Chassis Straightening Frame Bench

The UnoLiner CRS6000T-DO Top-Lock Drive-On Chassis Straightening Frame Bench is the ultimate collision repair system. Its double scissor lift consisting of two strong L36 lifts gives this top-of-the-line straightening bench a 6000 kg lifting capacity. This is even more impressive when you consider the bench is a mere 17.5 cm high in its lowest position. Its bench frame is six meters in length and features a two-way locking system that allows for easy placement and combining of drive-on ramps, multiple accessories and pulling towers all around the bench. In short, the CRS6000T-DO is a powerful addition to any repair workshop.

Features

- 6 ton lifting capacity
- Low bench height of 17.5 cm
- Unique two-way locking system
- Multiple-angle 10-ton pulling ability
- Mechanical and hydraulic safety systems
- Perfect for a great variety of vehicles
