In-Ground Benches

R15 In-Ground Drive-On Ramp

The UnoLiner R15 In-Ground Drive-On Ramp has been specifically designed for in-ground installation of UnoLiner straightening benches. Because of its hinged design, the R15 ramp lies flat on the floor when the bench is in its lowest position, which saves space and helps create an efficient workshop. This solution also simplifies car placement on the bench. Each R15 Set consists of four ramps.

Features

- Hinged for optimum efficiency
- Strong and durable
- Automatic roll-off protection
- For In-Ground benches

Technical data

Weight per section	18	kg
Total length	1250	mm
Width	430	mm
Max. load per section	1500	kg
Drive-on height	65	mm
