Riveting

RV8E 8 Ton 18V Handheld

This handheld UnoLiner RV8E packs quite a punch with its 8-ton pushing and pulling capacity. Despite its compact size, the RV8E is a durable and powerful riveting device, approved by Ford and also suited for specific rivet mandrils of many other car brands, such as Audi, Mercedes, BMW, Ferrari, and Porsche. Its pulling and pushing actuator controls a powerful electrohydraulic pump, which guarantees strong and silent operation. The RV8E is also capable of removing rivets with standard dies. Pressing time can be regulated, and when a set force is obtained, the device can retract automatically.

Features

- Strong, lightweight construction
- Approved by Ford
- Suitable for many different car brands and types
- Compression arms sizes: 40, 120, or 240 mm
- Built-in software to track riveting

Technical data

Pushing and pulling capacity	8000	kg
Weight	5	kg
Compression head rotation	360	degrees
Adjustable compression force	20-90	kN
